MARCH 22, 2014

Interview with Engr. Martin Manuhwa, President of SAFE0

Engr. Martin Manuhwa is the President of Southern African Federation of Engineering Organizations (SAFE0). He is the Chairman, Engineering Council of Zimbabwe and incoming chairman, Anti-Corruption Committee in the WFEO Executive Council.

E-Newsletter: *What are your plans to towards corruption which can jeopardize engineering and engineering projects as well?*

Engr. Martin: Our strategy as a committee is to come up with a plan that will help in three ways; one, to inform and educate the engineering profession about how corruption occurs, so that they can help prevent it with strategies. This will involve train-the-trainer courses, as well as anti corruption programs which must start from curriculum trading as well as how we can deal with corruption from the conception of projects, implementation, commissioning and decommissioning, throughout all the faces. That is the first one which is train-the-trainer. The second one will be to engage stakeholders. We have a set of

Engr. Martin Manuhwa

identified stakeholders. These stakeholders are the Institutions of engineering like WFEO, NSE, ZIE and we are also going to engage governments so that they can have anti-corruption legislation. We are also going to deal with those that give money like World Bank, African Development Bank and we will work together with them to ensure that we entrench strategies to do so. We will also deal with the project owners themselves, the professional engineers and then the general public. So this has to do with the awareness and anti-corruption training. We will also influence the third part of our strategy to influence long term thinking and strategies to have standards which is the Anti-bribery Standard and other legislative interventions.

E-Newsletter: *For the new generation what strategy will be adopted for anti-corruption education?*

Engr. Martin: For the new generation, our hope and promise is that they come at the right time as young engineers and future leaders. They should ensure and embrace sustainability and anti-corruption practices in their engineering practice

NSE Port Harcourt Branch Executive Committee members and the resource persons in a group photograph during a training on Meeting Management held on Thursday 20th March 2014 at Engr. Ishmael A. Banigo secretariat, Port Harcourt.

World Engineering Conference on Sustainable Infrastructure,
2nd - 7th November 2014, Abuja-Nigeria.
Theme: *Development of Sustainable Infrastructure in Africa*
