Interview with Dr. Alioune Traore on ccTLD

Dr. Alioune Traore is the Vice President of the Internet Society Mali Chapter. He is a former Board Member of African Network Information Center (AfriNIC).

Dr. Alioune Traore

E-Newsletter: *What is ccTLD?*

Dr. Alioune: ccTLD means country code Top Level Domain. It is a representation for countries on the Internet. It is like the flag of a country on the internet. Each country has a two code name which is the top level domain that represents the country. For example, if you are from Nigeria, .ng is the ccTLD for Nigeria and .ml is the ccTLD for Mali. It is

good for organizations to use their various country's ccTLD for unique identification.

E-Newsletter: *What advice do you have for the people and organizations that are yet to embrace their country's ccTLD?*

Dr. Alioune: My advice to them is that they should go to the registry organizations in their various countries that are in charge of their country's ccTLD and register to get their own country code because their society or organization is a representative of their country.

E-Newsletter: *Thank you sir.*

The

Ni-

gerian Institution of Electrical and Electronics Engineers Port Harcourt Chapter in a meeting held on Wednesday 7 May 2014 at Engr. Ishmael A. Banigo secretariat, Port Harcourt. The meeting was chaired by the Chapter Chairman Engr. B. T. D. George FNSE (left). Before the meeting commenced there was a technical presentation titled "Cloud Computing: Service Models, Challenges and Economic Importance" by Engr. Gideon Fatumbi on behalf of Oluwo Oluwakolade who was to make the presentation.

World Engineering Conference on Sustainable Infrastructure,
2nd - 7th November 2014, Abuja-Nigeria.
Theme: *Development of Sustainable Infrastructure in Africa*

**2014 WORLD ENGINEERING
 EDUCATION FORUM**
 ENGINEERING EDUCATION FOR A GLOBAL COMMUNITY

3-6 December 2014

**Dubai International Convention and Exhibition Centre
 Dubai, United Arab Emirates**

Following in the footsteps of WEEF 2010 in Singapore and WEEF 2012 in Buenos Aires, the 2014 World Engineering Education Forum is bringing together a whole array of activities. The Forum combines a number of international engineering education confer-

ences, and promises to be the largest ever conference on engineering education.

Under the theme “**Engineering Education for a Global Community**”, The World Engineering Education Forum – WEEF 2014 – will include over 70 multidisciplinary sessions, bringing together the world most renowned experts to address the latest innovation, advances, technology, issues and challenges in engineering education.

As communication and mobility barriers disappear and individual behavioural patterns transform, engineering educators and researchers are becoming increasingly aware of the importance of international dialogue. Global collaboration serves as a means to discuss common challenges and new approaches to deal with them, and to share examples of good practices with the global engineering education community.
