MARCH 14, 2015

Interview with Engr. Dr. Folarin Alonge

Engr. Dr. Folarin Alonge, is the Director of Membership Services Department of the Nigerian Society of Engineers.

E-Newsletter: *Sir, as the Director of the Membership Services Department, what are the plans your Department?*

Dr. Folarin: The major areas of our tasks are: membership drive, the other is debt recovery, and the third has to do with membership directory and of course membership professional development. Basically those are things we have been looking at but we want to concentrate on the coming generation. We want to mobilize students and graduates so that we can have more people involved. As they are coming up they get interested and stimulated to become members of the Nigerian Society of Engineers and also consolidate on the current efforts being made by the Society in terms of membership growth and in terms of excellent delivery of services to members so that within this short peri-

od and we will be able to do that through team work that has actually been established. So we are basically not doing anything new but to add value to what is already on ground by improving in terms of quality and getting more results. That is the areas of focus.

E-Newsletter: *You have just said that amongst your targets is increasing the membership at the graduate and students level; do you have any specific plan to propose?*

Dr. Folarin: Yes we are planning to get to the universities and the colleges, working hand in hand with the branches and divisions to get to those campuses on quarterly bases to visit at least six universities to encourage them and to get them registered and stimulate their interest in the Nigerian Society of Engineers. We will tell them the benefits they will gain with the Society and some other things they can look up to getting by becoming members as student members or graduate members.

E-Newsletter: *Thank you sir.*
