FEBRUARY 20, 2016

Interview with Ing. Augustine Kuuire, MGhIE

Ing. Augustine Kuuire, MGhIE, is the Chairman of the Governing Board of Engineering Council, Ghana.

E-Newsletter: *Sir, what do you have to say about Engineering Regulation across Africa, is it suppose to be uniform or each country should have its own form of regulation?*

Augustine: Definitely engineering is engineering everywhere. So what is happening in Ghana should happen

Augustine Kuuire

everywhere as to develop standard that will cut across all countries. There should be a programme that should go regional first, that is the West African region then it can go across Africa. There should also be a continental regulatory body so that engineering practice will be similar in all the African countries, though it may take a little bit of time but if we have a standard regulation for engineering practice it means once you qualify from one country and from one institution it means such person can practice in any African country and with this there will be standard and uniformity.

E-Newsletter: *Thank you sir.*
